Working with leading investment managers from around the world

Omnis Investment's approach to investing involves identifying and selecting the world's best-in-class investment managers. We bring them to you through a range of Omnis funds, that are made available through a well-diversified portfolio.

The managers we partner with are the world's leaders in their particular field, selected through a rigorous selection process - which offers you the potential to maximise your investment returns within your chosen level of risk.

This is just one of the reasons why thousands of individuals, couples and families trust us to invest on their behalf.

This brochure showcases the range of Omnis funds and the investment management partners who manage the investment component of the funds. Not only do we offer you access to the best investment managers, our own Omnis professionals will apply on-going oversight to each of the funds as well.

Situations change all the time, and there will be instances where we will be required to change the investment managers on our funds. The Omnis model means the team can decide if they need to find a new investment manager and then manage the transition without investors having to buy and sell funds.

On the next few pages, you will see information about each fund group, the individual investment managers and why Omnis use them to manage your money.
