

## Portfolio Objective

The Service is designed for a balanced investor, with:

- Knowledge about financial matters, and shows some interest in keeping up to date with them.
- Some experience of investment, including in funds containing assets such as shares and government bonds.
- An understanding in general terms that investment products should be held for a minimum period of five years.
- An understanding that the value of their investments could rise or fall.

The Service aims to improve total returns and actively manage short-term risks through increasing or decreasing holdings in asset classes and individual funds. These allocations are determined by the Omnis Investments Limited investment team, which benefits from full transparency of the funds' underlying investments, and is controlled through a strict governance framework.

## Risk Range

The Openwork Partnership will risk-rate investors based on their answers to a number of questions and appropriate validation.

○ Limited risk
 ○ Cautious
 ○ Balanced
 ○ Adventurous
 ○ Speculative

This portfolio is risk-rated as Balanced

## Portfolio Details

Launch date	31 May 2024
Discretionary fee	0.10%
OCF of underlying investments	0.47%
Total investment cost	0.57%

## Strategic Asset Allocation

## Investment highlights

**Relative performance** - Most stock markets rose with small caps outperforming large caps as they should benefit from Trump's policies. Growth outperformed value, which was hurt by a weaker healthcare sector. DM outperformed EM due to China's stimulus measures. Government bonds outperformed corporate bonds, although there are concerns about higher inflation coming from Trump's policy proposals.

**Tactical asset allocation** - Rate cuts should pave the way for out-of-favour asset classes to come back into vogue, including value, small cap and sovereign debt. Investors are already tilting their portfolios to these areas. Our diversified portfolios hold all these asset classes, and we'll continue to make tactical decisions to capture opportunities we identify.

**We remain cautiously positioned** - We have an overweight allocation to bonds and slight underweight in equities. Although stock markets have rallied, a weaker economy could put pressure on company revenues. Our central case remains falling inflation, a peak in the interest rate cycle and a soft landing, but with a larger than normal risk of a deeper recession.

## Overweight/Underweight Position Relative to Strategic Asset Allocation
