

Omnis Managed Portfolio Service

- Defensive

March 2025

Portfolio Objective

The Service is designed for an investor who is looking to minimise their exposure to risky assets for a short time frame.

- This might be someone who is looking to consolidate gains ahead of a specific objective or who is concerned about prevailing market conditions. As such, they will have a preference for outcomes that have a degree of certainty.
- While, they understand that the value of their investment could fall or rise, the level of these changes is likely to be lower than portfolios which invest more in risky assets (like global equities).
- They know that this is not a long-term holding for their investment as the value is likely to diminish in real terms over time.

The Service aims to improve total returns and actively manage short-term risks through increasing or decreasing holdings in asset classes and individual funds. These allocations are determined by the Omnis Investments Limited investment team, which benefits from full transparency of the funds' underlying investments and is controlled through a strict governance framework.

Risk Range

The Openwork Partnership will risk-rate investors based on their answers to a number of questions and appropriate validation.

○ Limited risk
 ○ Cautious
 ○ Balanced
 ○ Adventurous
 ○ Speculative

This portfolio is risk-rated as Limited Risk

(Note that it is not designed to be held as a medium to long-term investment.)

Overweight/Underweight Position Relative to Strategic Asset Allocation

Discrete Annual Performance (as at 28/02/2025)

	29/02/2024 28/02/2025	28/02/2023 29/02/2024	28/02/2022 28/02/2023	28/02/2021 28/02/2022	29/02/2020 28/02/2021
Portfolio	5.76%	2.83%	-8.00%	-0.03%	3.23%

The above figures show the indicative performance of the portfolio, which includes all asset allocation trades. Your individual performance will depend on the date of your investment.

The last 12 months...

When investing, it is always important to take a medium to long-term perspective. This is because shorter term periods can be much more volatile and deliver lower and sometimes negative returns, as illustrated by the rolling 12-month periods shown above.
