

Omnis Managed Portfolio Service

- Adventurous

June 2025

Portfolio Objective

The Service is designed for an adventurous investor, who should be:

- An experienced investor who has used a range of different investment products in the past.
- In general terms, they will understand that investment products should be held for a minimum period of five years.
- They will be prepared to accept fluctuation in the value of their investments in order to be able to obtain a higher rate of return in the long run.
- They are similarly not likely to be concerned if the value of their investments were to fall in the short term.

The Service aims to improve total returns and actively manage short-term risks through increasing or decreasing holdings in asset classes and individual funds. These allocations are determined by the Omnis Investments Limited investment team, which benefits from full transparency of the funds' underlying investments, and is controlled through a strict governance framework.

Risk Range

The Adviser will risk-rate investors based on their answers to a number of questions and appropriate validation.

The last 12 months...

When investing, it is always important to take a medium to long-term perspective. This is because shorter term periods can be much more volatile and deliver lower and sometimes negative returns, as illustrated by the rolling 12-month periods shown above.
