

Portfolio Objective

The Service is designed for a balanced investor, with:

- Knowledge about financial matters, and shows some interest in keeping up to date with them.
- Some experience of investment, including in funds containing assets such as shares and government bonds.
- An understanding in general terms that investment products should be held for a minimum period of five years.
- An understanding that the value of their investments could rise or fall.

The Service aims to improve total returns and actively manage short-term risks through increasing or decreasing holdings in asset classes and individual funds. These allocations are determined by the Omnis Investments Limited investment team, which benefits from full transparency of the funds' underlying investments, and is controlled through a strict governance framework.

Risk Range

The Adviser will risk-rate investors based on their answers to a number of questions and appropriate validation.

○ Limited risk ○ Cautious ○ Balanced ○ Adventurous ○ Speculative

This portfolio is risk-rated as **Balanced**

Portfolio Details

Launch date	31 May 2024
Discretionary fee	0.10% p.a.
OCF of underlying investments	0.47% p.a.
Total investment cost	0.57% p.a.

Investment highlights

Portfolio rebalance with added ETF exposure. We rebalanced all Agility portfolios in late April and introduced two new ETFs to reflect our latest tactical asset allocation views. These changes help ensure the portfolios remain diversified, responsive to market shifts and positioned to capture opportunities as they emerge across global markets.

Targeting US smaller companies. We increased exposure to US smaller companies by adding the SPDR Russell 2000 US Small Cap UCITS ETF. Valuations remain attractive relative to large caps, and smaller firms may benefit more from any improvement in the US economy. With investor focus still skewed toward mega-cap stocks, we see room for rotation into smaller names.

Increasing allocation to China. We also added the iShares MSCI China A UCITS ETF to capture opportunities in Chinese equities. Policymakers are stepping up support for growth, and many domestically focused companies are less exposed to US trade tensions. We believe this part of the market offers selective value and potential upside as stimulus measures begin to take hold.

Portfolio	5.35%	-	-	-	-

The above figures show the indicative performance of the portfolio, which includes all asset allocation trades. Your individual performance will depend on the date of your investment.

The last 12 months...

When investing, it is always important to take a medium to long-term perspective. This is because shorter term periods can be much more volatile and deliver lower and sometimes negative returns, as illustrated by the rolling 12-month periods shown above.
