Omnis Agility V
October 2025

Portfolio Objective

The Service is designed for an adventurous investor, who should be:

- An experienced investor who has used a range of different investment products in the past.
- In general terms, they will understand that investment products should be held for a minimum period of five years.
- They will be prepared to accept fluctuation in the value of their investments in order to be able to obtain a higher rate of return in the long run.
- They are similarly not likely to be concerned if the value of their investments were to fall in the short term.

The Service aims to improve total returns and actively manage short-term risks through increasing or decreasing holdings in asset classes and individual funds. These allocations are determined by the Omnis Investments Limited investment team, which benefits from full transparency of the funds' underlying investments, and is controlled through a strict governance framework.

Risk Range

The Adviser will risk-rate investors based on their answers to a number of questions and appropriate validation.

Limited risk · Cautious · Balanced · Adventurous · Speculative

This portfolio is risk-rated as Adventurous

Portfolio Details

Launch date	**31 May 2024**
Discretionary fee	**0.10% p.a.**
OCF of underlying investments	**0.52% p.a.**
Total investment cost	**0.62% p.a.**

Investment highlights

No changes in September. Following August's rebalance of all Agility portfolios, we made no changes in September.

Risk appetite rewarded. Risk appetite was rewarded for the month, with global equities performing strongly. Broad risk sentiment was assisted by the US Federal Reserve recommencing interest rate cuts. The strongest returns came from emerging markets and Asia (ex-Japan).

Remain cautiously positioned. We have a slight overweight in bonds and underweight in equities. While equities continue to perform well, we are starting to see early signs of slowing economic growth, which could pressure equity valuations. We remain underweight the US due to a combination of high valuations and increased concentration risk. Our base case expectation of falling inflation, easing monetary policy and a soft-landing remains, although risks of a deeper recession remain elevated.

Discrete Annual Performance (as at 30/09/2025)

	30/09/2024 30/09/2025	30/09/2023 30/09/2024	30/09/2022 30/09/2023	30/09/2021 30/09/2022	30/09/2020 30/09/2021
Portfolio	11.94%	-	-	-	-

The above figures show the indicative performance of the portfolio, which includes all asset allocation trades. Your individual performance will depend on the date of your investment.

The last 12 months...

When investing, it is always important to take a medium to long-term perspective. This is because shorter term periods can be much more volatile and deliver lower and sometimes negative returns, as illustrated by the rolling 12-month periods shown above.
